Market Replay

The Market Replay Plug-in provides the ability to record price and volume history in order to re-play market activity at a later time.

Market Replay Console

In order to utilize this tool, you must install the Market Replay plug-in from the Open E Cry website. After the product has been installed, click File -> Plug-in -> Market Replay to invoke the console. From the console, the following actions and information will be available:

Start () – Begins the playback of a selected session

Pause () – Pauses the current playback

Stop () – Stops the current playback

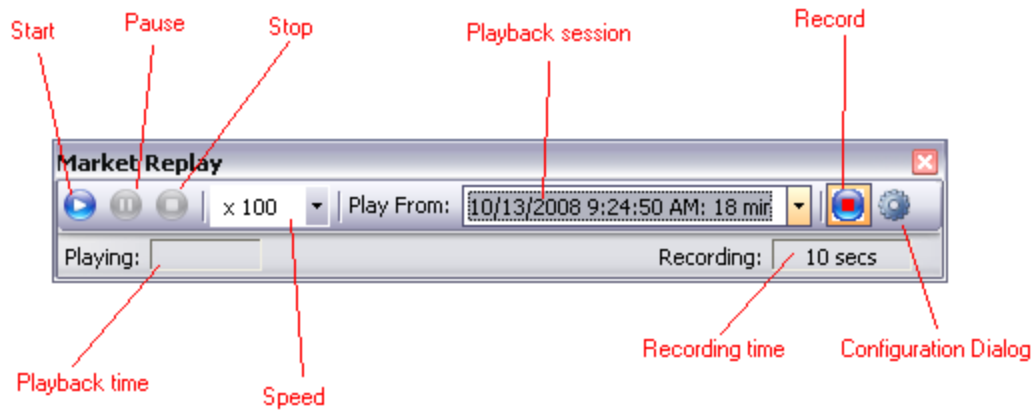

Speed () – Speed of the playback relative to real-time (i.e. x2 is twice as fast, ½ is one-half as fast)

Playback Time ()

Session () – Name of the session

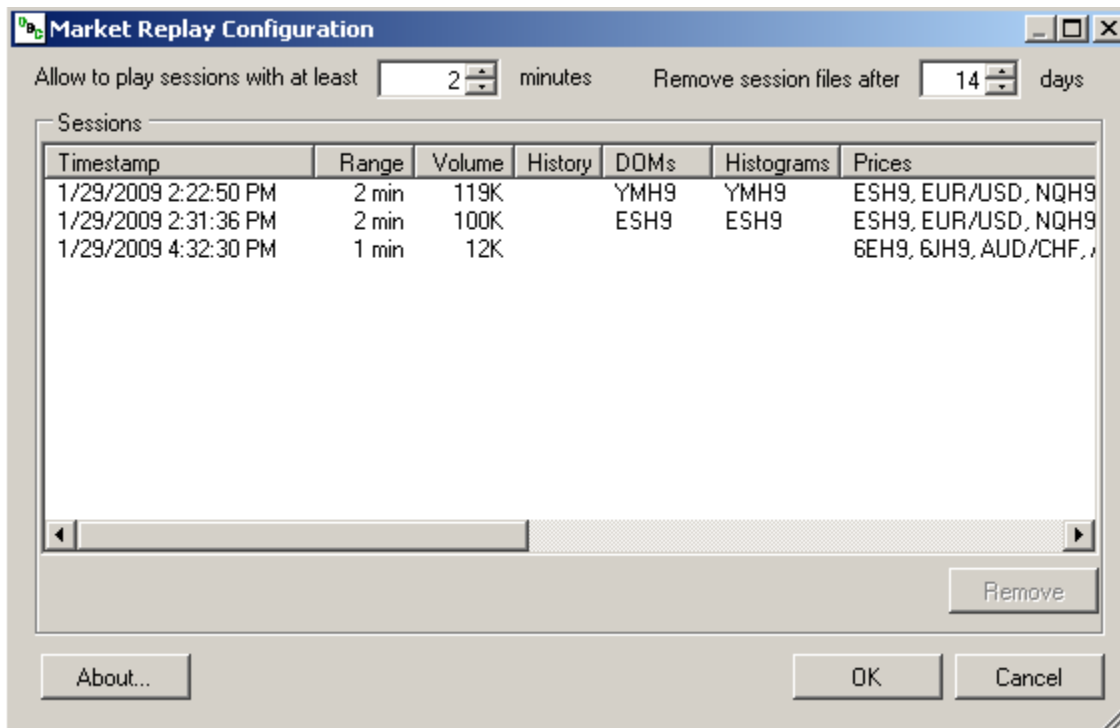

Record () – Begins (and stops) a session's recording

Configure () – Launches the configuration panel

Market Replay Configuration

The configuration dialog allows you to see and manage your recorded sessions. The

Session files can be purged by changing the 'Remove session files after' parameter. The number of days selected will be matched against the time recorded to determine if the session should be removed.

Sessions can be sorted by clicking any of the column headers, and can be removed by simply clicking the remove button.
